This morning I picked up the photocopies of [REDACTED] medical records from the [REDACTED] Department. I was told the copies represented everything from this year's physical exam forward. I reviewed these records with [REDACTED], Secretary and determined there were no prescriptions amongst these documents. I asked her if there was a drug log somewhere else where they would record medication given to [REDACTED]. She indicated there was some sort of log in the computer but she did not have access to it. We discussed the fact that the [REDACTED] had indicated [REDACTED] was on Vicodin, a muscle relaxer, for an injury he sustained over the summer. She then stated Vicodin was one drug they did not stock. I asked where the [REDACTED] would go to get prescriptions filled if one had been written. She indicated the [REDACTED] Pharmacy located on [REDACTED] Road near [REDACTED]. I asked how the prescriptions are obtained since this pharmacy is quite a distance off [REDACTED]. [REDACTED] indicated a student trainer usually picks the prescriptions up.

I visited this pharmacy, showed my credentials, and inquired whether they had record of any prescriptions filled for [REDACTED]. Pharmacist [REDACTED] checked their computer and indicated one for Vicodin was filled on 11/14/97. I requested and obtained a photocopy of the prescription, he made a copy of the medical release signed by [REDACTED] father. The Pharmacist indicated the prescription had been filled only once although refills were indicated. On 11/14/97, 20 tablets were dispensed. The prescription called for 1-2 tablets every 4 hours as needed for pain. A check with the PDR describes this drug as 5 mg Hydrocodone Bitartrate/500 mg Acetaminophen.

I am in the process of contacting the Head Trainer [REDACTED] to ascertain whether or not additional drug dispensing information exists. Given the fact that the prescription was most likely picked up for [REDACTED], I have not determined whether he was given the entire 20 tablets or possibly stored in the training room for him to request as needed.

One record dated 11/10/97, prescribes treatment as Flexeril 10 mg, Tylenol/Ibuprofen, Ice/Heat. There is no documentation, however, any indication as to whether the Flexeril was dispensed, and no record of it at the [REDACTED] Pharmacy.
